

# THE BASSANO RECORDER

VOLUME SIX, NUMBER 18

BASSANO, ALBERTA, THURSDAY, JULY 16th, 1942

LICENCE NUMBER 72794

## Mrs. C. Wyatt Laid To Rest

On Monday afternoon, at two o'clock, the funeral service of Mrs. C. Wyatt was conducted in the Knox Presbyterian Church by the pastor, Charles F. Laine. Mrs. Wyatt, formerly Cornelia Morgan, was born in the State of Missouri, on March 1st, 1860, and in the year 1880 was joined in marriage to Columbus Wyatt. It was in 1910 that they came to Bassano and built the house which stands immediately opposite the Presbyterian Church. Seven years later they moved to Pandora, and from there to Rosemary where, in 1923 Mr. Wyatt passed away and was laid to rest in the Bassano Cemetery.

Since that time Mrs. Wyatt has resided in turn in Calgary and in the States, until three years ago when she came to reside with her daughter, Mrs. J. D. Pierce at Tilly. It was there that on Friday, July 10th, she passed away at the age of 81 years, four months and nine days. She was a member of the Baptist Church during the long years of a well spent life, which the Pastor completed in a stock of corn that cometh in its season. There were a large number of floral tributes.

Surviving her are four daughters and one son, ten grandchildren and four great grandchildren. To all of these we extend our sincere sympathy in their bereavement. Interment was made at Bassano Cemetery where she was laid to rest by the side of her deceased husband, and floral tributes were laid upon both graves. The pallbearers were four young ladies, Miss Geraldine Stevens, and Misses Marion, June and Carol Pierce, all grand-daughters of the deceased whose performing of this last duty to their grandmother was a fitting and unique gesture which betokened the love and respect in which they held her.

## LETHBRIDGE MAN DIES HERE ON TUESDAY

Struck by Flying Pipe, John Drobot Is Brought Here From Brooks For Medical Treatment.

Fatally injured Monday when a pipe from the new gas well at Brooks blew off and struck him on the head, John Drobot, 58-year-old Lethbridge man, died in the Bassano Hospital on Tuesday.

Drobot, a member of the distribution crew of the Canadian Western Natural Gas, Light, Heat and Power Company, went to Brooks to connect the new well to the town's main gas line. He was cementing the casing when accumulated gas pressure caused a connection to give way.

The injured man was rushed to the nearest hospital here where he was attended by Dr. A. G. Scott. The body has been shipped to Lethbridge where the burial will take place.

## Number To Start Training In Alta. Largest In War

In the largest month of mobilization in Alberta since the calling of men was begun for defense of Canada, 1,142 men from 21 to 39 years of age are in the list for compulsory training.

The men are being called at the rate of 60 a day and will report for examination at Calgary, Edmonton and Grande Prairie. In the total are 968 new trainees and 174 men who have already received 30 days training under the old system. Of the number 540 will report to the district depots at both Calgary and Edmonton and the balance of 602 will report to Grande Prairie. It is understood that the men called to Calgary will train with the 31st (Alberta) Reconnaissance Regiment (Active) at Camp Sarcee.

A number of trainees called previously are at present training with the Home Guard for basic work. Indication is that the number of men called under the National Mobilization Act will be increased hereafter to meet the demand being made by the army for men.

Rolling off the assembly line in a Canadian aircraft plant, these two engine-building bombers are moving swiftly toward a rendezvous with the enemy. Production of bombers, fighting and training aircraft in Canada has grown to impressive proportions since the early days of the war when the Canadian aircraft industry was in a pioneer state. Canadian workers are turning out five types of training planes, supplying the vast British Commonwealth Air Training

Plan; two types of service planes, which are regarded as first class fighting machines and the Link trainer, for preliminary ground instruction.

## Personals

Cpl. Ken Hansen and Mrs. Hansen left on Sunday for a holiday trip to Prince George.

Mr. Ted Stiles of Calgary was a Bassano visitor during the week-end.

Staff-Sgt. Charlie Honey was in town for a short visit on Wednesday.

Miss Isabelle Brown of Craigville and Miss Irene Briggs are visiting with Miss Margery Miles.

Mr. George Dagn of Olds was in town on Monday night.

Saturday visitors to the Stampede included Don and Johnny Fraser, Ken and Norman Lantstod and Charlie Hayes.

Miss Dorothy Flanagan was a Calgary visitor the first part of the week.

Mr. Don Canacher was a Calgary visitor on Saturday and Sunday.

Miss Betty Ann Beeber is visiting in High River with her sister, Mrs. Ronnie Brent.

Miss Lillie MacLean is visiting with friends in Calgary.

Set-Pilot and Mrs. R. C. MacLean leave for Ottawa Thursday night where Ronnie will train as an instructor, completion of the course to be taken at Trenton, Ont.

Ernie Goughen, R.C.A.F., passed through town the other night on his way west.

The Misses Pat, Shirley and Joyce Smith have returned home after attending the Stampede.

Many friends of Mr. and Mrs. H. G. Angel are glad to know that they will return to Canada this fall.

Mrs. Art Sheppard and children of Vancouver are expected in Bassano this weekend to remain for the duration.

The ladies of the St. Columbus Altar Society are sponsoring a Strawberry Tea to be held on Saturday afternoon, July 19th, at the home of Mrs. L. Simonds. All ladies are invited to bring tickets for a "Sunday fried chicken dinner" hamper, will be sold during the afternoon. Proceeds for Mission Hospital.

Miss Mary Walsh has successfully passed her Toronto Conservatory of Music grade nine examinations. Miss Walsh has been studying piano with the Toronto Conservatory of Music for the past nine years.

## Call-ups Must Request Postponement Immediately

When a recruit receives his notice to take a medical examination to ascertain whether he is medically fit for military training, he must go before a doctor within three days for his examination at the notice informs him. It would be wise for him to ask the doctor whether he has been placed in category "A" for no one is being called for service at present, who is not placed in Category "A". If he is placed in Category "A" and desires a postponement of his training he must apply in writing to the Registrar of the War Services Board at Edmonton within eight days of the date, not the receipt of the notice, stating the reason for his application. If he is employed by another, the employer should support the application. If there is such a delay in the medical examination, he cannot take the examination and make his application within the specified time he can and must send in his application not later than the day he seeks his medical examination. He need not and should not apply in person at the Registrar's office. His failure to make his application as and within the time specified will probably result in his failure to secure a postponement, however desiring he may be of such postponement, for the Board is forbidden to grant a postponement within fourteen days of the date at which he is subsequently notified to report at the military training centre. The provisions apply to everyone including farmers who are entitled to postponements if they are so entitled only if they apply as stated.

The delay in the notice reaching the recruit is in nearly all cases due to his failure to comply with the Regulations requiring him to notify the Registrar of any change of address, the result being that the notice may travel from Post Office to Post Office before it reaches him. Under the Regulations not merely must he notify the Dominion Statistician, which most of them do by going to the Post Office and signing a postal card which is furnished them, but he must also notify the Registrar of the Division and his failure to do so may result in his being deprived of the right to request a postponement and in addition will render him liable to a penalty under the Regulations.

In all cases in which a farmer applies for a postponement he should not only send in his written application but he should fill in all the answers to the questionnaire sent him and have the facts certified by someone in authority who has personal knowledge of them, and forward it with his written application. The observance of these Regulations will avoid disappointment for they have the force of law and the Board must see that they are carried out. The Board is required to send a specified number of recruits to the training centre and on the specified days and after the list is made up and the notices sent out it is too late to make changes, and it is useless to make applications, for the Board is forbidden to grant them.

When a postponement has been granted and a further postponement is desired, it is essential that application be made within the time specified in the notice advising of the postponement, whether a farmer or not.

ush Commonwealth Air Training Plan; two types of service planes, which are regarded as first class fighting machines and the Link trainer, for preliminary ground instruction.

Smoky Lathrop visited at his home in Chaplin, Sask. for a few days, he is returning with him.

Joe Robert, Sid Rodbourne, J. Clark and Ollie Boren had a branding bee at the J. Clark ranch a week ago. While the men folk worked in the corral, the ladies, consisting of Mrs. J. Robert, and three daughters, Mrs. K. Downs, Mrs. Law, Mrs. G. Montgomery, Mrs. Sid Rodbourne and Mrs. Hefflebower assisted Mrs. Clark in preparing a picnic lunch in the kitchen. The other young men of the place were also present.

Mr. and Mrs. Sid Rodbourne, accompanied by Miss Mabel Jones are spending a week at Banff.

Congratulations to Mr. and Mrs. Marie Campbell on the birth of another son.

Mr. Jack Bulger has the position of running the Pool Elevator at Makepeace this year.

Bert Rose, Tom, Bill and Armand Rodbourne motored to Lethbridge on Wednesday to attend the auction sale there.

First time in a number of years the district has been too wet to summerfallow. While the wheat has grown rapidly, so have the weeds.

Mrs. Montford Kelly Sr. of Calgary was the house guest at the Hefflebower home over the week-end.

Fred Bulger and Andy Stewart attended the sale at Lethbridge. Fred purchased a registered Hereford bull.

Mrs. J. Clark is visiting at the home of Mr. and Mrs. Sher Weir of Creston, B.C.

The last Red Cross meeting was held at the home of Mrs. F. Nall. A very pleasant day was spent.

The following articles were turned in: Fourteen pair of children's pants, 2 children's dresses, 1 ladies' dress, 9 pair children's pyjamas, 4 pair men's pyjamas, 2 pair mitts, 1 pair men's socks, 1 skull cap.

The next meeting will be held at the home of Mrs. George Nelson. All the members are requested to be present.

## 6c Cream Bonus To Help Increase Production

A six cents a pound subsidy on butterfat was authorized by the Wartime Prices and Trade Board, effective on July 6th. This butterfat subsidy is equivalent to five cents a pound on creamery butter. The price of butter was previously fixed at 35c a pound.

The subsidy became necessary because butter production has not kept pace with increased consumption. Canadians are eating more than two million pounds of butter each month in excess of the five year average consumption. This subsidy will cost the federal government \$15 million.

There will be no Church service in the Bassano Anglican Church on Sunday, July 19th.

## E.I.D. DELEGATION SUCCESSFUL AT CAPITAL

### MAKEPEACE

(By Our Correspondent)

With the unusual amount of rain that has been fortunate enough to enjoy, the crops are giving evidence of a splendid yield, and farmers are busy repairing buildings to contain the wheat. Some of the crops are also very promising.

Quite a number around the district attended the Calgary Stampede this year. Ollie Boren, Arthur Rodbourne, Bill, Tom and Leah Rodbourne, Joe Tierney, Helen Martin and Arthur Arison, H. J. Ross, Tom Mullin, Irene Heyford, Zelpha Heyford, Lois Bulger, Harold and Donald Nall, Maxine Nall, Herman Jorgensen and family.

Smoky Lathrop visited at his home in Chaplin, Sask. for a few days, he is returning with him.

Joe Robert, Sid Rodbourne, J. Clark and Ollie Boren had a branding bee at the J. Clark ranch a week ago. While the men folk worked in the corral, the ladies, consisting of Mrs. J. Robert, and three daughters, Mrs. K. Downs, Mrs. Law, Mrs. G. Montgomery, Mrs. Sid Rodbourne and Mrs. Hefflebower assisted Mrs. Clark in preparing a picnic lunch in the kitchen. ## Inside District May Be Organized As Found Area. Horses and Other Stock at Large Will Be Impounded.

Horse and other domestic animals running at large in the Eastern Irrigation District have become such a nuisance that the officials of the E.I.D. decided some time ago to take action.

Following this decision, a delegation of four men, consisting of Mr. L. C. Charlesworth, R. L. Rose, C. McKinnon and Glen Jones went to Edmonton to take the matter up with the Minister of Agriculture. Mr. Archie Campbell, Livestock Commissioner and Hon. Solon Low were also present at the meeting. The Minister of Agriculture, Mr. Low expressed the opinion that the proper course of action was for the Minister of Agriculture to establish the whole E.I.D. as a pound district on receiving request from the Board of Trustees, any other form of petition being dispensed with. The Minister of Agriculture and the Livestock Commissioner agreed that this course would be followed.

It was arranged that they would appear at poundkeepers men recommended by the Board, each covering whatever pound area was desired by the Board of Trustees. Mr. Campbell explained that where there was no poundkeeper appointed, there would be no pound.

At present there are two pounds in the District, one at Cochrane covering Townships 21-24, covering all classes of livestock for the entire year. J. W. Dick is the pound keeper. The other pound is at Rolling Hills where E. Youngstrom is the poundkeeper.

The following resolution has been recommended for consideration by the Board of Trustees: "That the Minister of Agriculture be requested to constitute the Eastern Irrigation District as a pound district covering all domestic animals for the entire year and to appoint pound keepers for whatever particular areas within the District appear to be necessary and desirable and that the General Manager be and he is hereby authorized to make application to the Minister of Agriculture and to recommend poundkeepers for specific areas in accordance with this resolution."

## Buying Practice of Packers Attacked by Co-op Group

Charges that the Dominion hog carcass grading regulations have been completely discredited in many Alberta rural areas by the buying practices of some of the packing companies was made at the annual meeting of the Alberta Livestock Co-operative Association in Edmonton this week. Immediate action to check this growing menace to the industry was urged.

Other resolutions urged higher prices for bacon in line with higher American hog markets and producer representation on the Dominion Bacon Board.

Protest against the "very high handed and rather unfair advantage" being taken by the federal government regarding livestock prices, in consideration of the "United States farmers' quota in prices for the same commodity" was registered at the annual meeting.

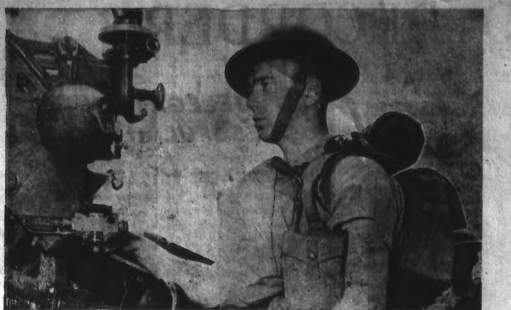

Report of the manager to the board of directors said considering that agriculture was forced to produce livestock at a loss through most of the public speaking, it looks rather unfair to see a call put on at present."

HIS NEXT APPEARANCE Excerpt from address by Mr. Marshall W. A. Bishop, V.C. at the theatre benefit in Toronto. First I had to make public speeches, then I had to make over the radio. Later and worst of all, I had to appear in the movies. Now I'm on the stage, and I wouldn't be surprised if next year I will appear as Miss Canada in a bathrobe beauty contest.

## United Nations in Western Canada

Symbolic of the various elements that are to make up our national unity this troupe of dancers who recently gathered at C.B.C. studio in Winnipeg.

His Specialty Is Heavy Artillery

Every man in Canada's Army is a specialist in at least one branch of military practice. Because officers of all training centres are drawn from many arms of the service, soldiers are familiar with the functions of the other branches, prepared for any co-operative plan

of attack on short notice. At Petawawa, for instance, artillerymen like the resolute cap setting his gun sights in the above photograph are prepared for co-operation with infantrymen, Royal Canadian Air

Force, the tank corps and any other force with which they may be combined in an operation. At every camp in Canada's network of training centres the program is proceeding, building a striking force which every day grows in size and strength.

## Camouflage Uses Cloth

Britain's airfields, gun-sites, lorry parks and other vital war centres are being camouflaged by a man who in peace time supervised the cutting and making up of thousands of dainty frocks and blouses.

No longer sits in the office of a Lancashire factory which during the past thirty years has sent frocks out to stores in most parts of the world. Today the dress expert climbs to vantage points in the countryside of England and Wales to make notes of the minutest details of the landscape around the site to be camouflaged.

Returning to his factory, where yards of colored hessian cover cutting tables once gay with silks and cottons, he matches up the hessian with the color card he has brought back with him. The hessian is then cut into special patterns and is threaded through rope setting made by a manufacturer with a name known to fishermen the world over.

The threading is done by hand, and here the skill of the women dressmakers which comes from years of experience, is as valuable as their director's knowledge of color schemes. And the result of their work together is that vital points in Britain's defenses appear to Nazi aircraft as part of the landscape beneath them.

## Conserve Rubber On Machinery

(Experimental Farm News)

There will be no new farm equipment supplied on rubber tires for the duration of the war. Every farmer will have to make his present rubber equipment last until the war is over or he will be without the advantages or use of these machines at a time when they are especially necessary for increased production, reduced costs and to offset the labor shortage. Says G. N. Denike, Dominion Experimental Station, Swift Current, Sask.

Practically all rubber tires on farm machinery are made to give better service and longer life than normal if the following points are carefully noted:

1. Rubber is a perishable product and subject to damage by heat, freezing and thawing, direct sunlight and wet. Keep rubber tires under cover cover as much as possible when not in actual use, preferably in a cool, dry and darkened shed.
2. Rubber will age in time but its life can be prolonged by proper use when active, and proper protection when inactive.
3. All rubber tires, except the solid type, depend upon correct air pressure for their strength to carry the load and for their long wearing qualities. Check each tire for correct pressure at least twice every week when in use.
4. Low air pressure causes cracking of the tire walls and breaks in the fabric. Keep tires slightly above the average recommended pressure for longest wear and trouble free life.
5. Check the alignment of all wheels with rubber tires at frequent intervals. Any wheel which is out of true or improperly balanced causes excessive wear on that tire.
6. Never overload or overspeed rubber tires.

CULINARY CUES

Ethel M. Chapman is a native of Halton County, Ontario, and a distinguished graduate of Macdonald College. She is the author of several books and editor of the Home Section of the Farmer's Magazine. She is an expert in matters relating to nutrition and food conservation and will make this her subject when she appears as guest speaker on the National Farm Radio Forum Monday, July 20th, at 8:30 p.m. M.T. This program is heard regularly over station CBK, Watrous.

## News of the Week FROM THE Wartime Prices and Trade Board

Ottawa reports that the rise in the cost of living of six-tenths of one point on June 1st, as compared with May 1st, brings the index more than a full point above its level for the first time since the commencement of the price ceiling. Increase of the price of beef accounts for the rise in June.

This is the season in which prices normally reach their high point of the year. Recouping this normal seasonal variation in prices the Wartime Prices and Trade Board has permitted such commodities as beef lamb and potatoes to rise in price, but they will decline again in the late summer and early autumn.

It is possible that the July figures will be slightly higher than June. But in August, the cost of living will again decline as meats and vegetables become more plentiful, and their prices follow their normal seasonal curve.

### Beef Prices to Be Reduced

Beef prices are coming down. On Monday, July 18th, a cut of one cent per pound, wholesale, and retail for beef, will come into effect under the scale worked out by the Wartime Prices and Trade Board. This reduction applies to the best or red ribbon beef, and a proportionate decrease will work out for cheaper grades of beef, ranging from as much as two cents per pound. It is stated by the administration of the Board at Regional Offices at Edmonton.

**Asks Return of Sugar Coupons**  
In accordance with the ruling that householders and firms should request grades of beef, ranging from as much as two cents per pound, it is a steady flow of coupons coming in the marketing division, Wartime Prices and Trade Board, officials state.

Coupons are submitted to the Regional offices of the Board, Williamson Building, Edmonton, and will be received every two weeks, for as long as the supplies last or until the householder needs more sugar.

### Take Ration Cards on Vacation

Summer leave for any members of the Armed Services, and summer vacation plans for the young fry all come within the calculations of the sugar administration, Wartime Prices and Trade Board.

Any members of the Armed Services, or of the Women's Auxiliaries to the Armed Services, with leave of more than seven days will be given a ration card for sugar. But if leave is for seven days or less, they will have to rely on the hospitality of their friends for their sugar supplies. Anyone joining the services or entering barracks must relinquish his sugar ration card, which will be returned to the Wartime Prices and Trade Board.

### Misdeeds For Jewellers

When it comes to infringements of the consumer-credit regulations of the Wartime Prices and Trade Board, jewellers have received millions of penalty, to the glittering amount of \$70.00 and costs, when Shores Limited, Vancouver were convicted of three charges, in Vancouver, and \$25 and costs when Philip's Credit Jewellers Limited pleaded guilty to two charges, also in Vancouver.

### COOLING OF MILK

It is common knowledge that the souring of milk is caused by bacteria which grow very rapidly if the milk remains warm. To prevent this it is necessary to cool the milk to 50 degrees Fahrenheit or lower, if it must be held for any length of time before being pasteurized or consumed. Cooling of milk is best accomplished by immersing the pails of milk in cold water in an insulated tank. Where water is not cold enough to bring the milk to a proper temperature, either natural ice or electric refrigeration should be used, and the water stirred—Special wartime service Pamphlet No. 54 on "Cooling of Milk on the Farm," which may be obtained free from the Publicity and Extension Division, Dominion Department of Agriculture, Ottawa.

Area of the British Empire on all continents is estimated 13,000,000 square miles.

We should be patting ourselves on the back that there is no tax on the pig.

## Navies Radios Are Screened

Portable radio sets for ship crews which do not give away position to the enemy are now in use in Britain's Royal Navy. The Navy has received more than 15,000 sets and 25,000 pounds raised by voluntary subscriptions has been spent by the Admiralty in supplying them. Corvettes, minesweepers, sloops, submarines and torpedo boats are among the small craft whose ship's companies can now listen in when off duty. As the sets are "screened," they do not radiate, and so do not disclose the ship's position to the enemy.

The manufacturers made several modifications in a standard portable radio, giving it an exceptionally strong cabinet and fitting up the chassis so that the set would be able to stand up to the hand knocks likely to be received under Service conditions. It has roughly 800 separate parts.

No accumulator is necessary and the battery gives 30 hours' service. The makers have been able to issue fresh batteries at the rate of 1000 per week, and 10,000 valves have been sent out in the last twelve months. The Royal Air Force has been supplied with 5,000 sets and the Army has had 4,000. They are being used in many remote districts of Britain as well as in Iceland and the Middle East.

The manufacturers carried on producing the set throughout the "blitz" although factory and workshop were actually rased to the ground and many essential parts and machine tools were destroyed. Despite these difficulties they have been able to carry on, and there are now more than 100,000 of their sets in use.

"Mose," said Ebb, "what animal is re mo' noted for its fur?"  
"De skunk," said Mose positively, "De mo' fur yo' gus away fum him de bettah it ain fur you."

## SHE'S DOING WAR WORK

Not all war workers are found in factories. The farmer himself, his wife and very often the children too are actively engaged in the production of foodstuffs urgently needed for our fighting forces and civilians in many lands. Canadian farmers and their families have important war work to do... and are doing it.

H. W. HARPER

MANAGER

BASSANO, ALBERTA BRANCH

## The Royal Bank of Canada

## R.C.A.F. Makes Change In Training Policy

Important changes in the training and designation of Royal Canadian Air Force aircrew is indicated by recent instructions from Air Force Headquarters as received at the Calgary recruiting centre wherein several new branches of aircrew duties have been announced. Heretofore, in addition to the established categories of Pilots, Air Observers, and Wireless Operators (Air Gunners), there has been added those of Air Navigators, Air Bombers, and Air Gunners.

Under the new plan, candidates will be enlisted in three aircrew divisions. Those who will proceed from the Manning Depot and customary trainee duty must have Junior Matriculation or its equivalent through academic training under the War Emergency Training Plan and will graduate from Initial Training School as potential Air Observers, Pilots, Air Navigators or Air Bombers. The second class are those selected for training as Aircrew (Wireless School). These candidates will be posted following training and outfitting to a Wireless School. The third division is Aircrew (Air Gunner). These men are Air Gunners and proceed to a Bombing and Gunnery School.

The new setup means that now, lack of formal education is not a bar to enlistment for aircrew duties for there is a classification to fit all who have ordinary public school education, provided they prove themselves suitable in other respects by passing the medical and

classification tests as administered at R.C.A.F. recruiting centres.

Age limits for flying personnel remain the same, that is 19 to 32 inclusive except for pilots where the limit is 30 or under. Height and weight requirements for Aircrew (Initial Training School) are minimum height 5'7" and under 210 pounds. Aircrew (Wireless School) and Aircrew (Air Gunner) must not be over six feet or weigh more than 175 pounds.

The Air Gunner is one R.C.A.F. trade where it pays to be a "bambam". The Air Gunner's duties in operational flying often means close confinement in the narrow limits of a fighter or bomber plane gun turret for long stretches. For this reason many who come well within the height and weight and limits may be unsuitable owing to their particular build being of the short stout type. One has to be able to move quickly at times in the important business of protecting the aircraft from enemy attack.

One point is common with all classes of aircrew. All who graduate from their respective training courses do so with the rank of Sergeant and in a number of cases as commissioned officers. Sergeant's pay plus flying pay makes the R.C.A.F. airman a pretty flush individual on pay day. The scale runs from a Sergeant Air Gunner at \$2.95 per day to a Pilot Officer at \$9.25 which includes flying pay.

New quotas have been received at the R.C.A.F. Recruiting Centre in Calgary and men for aircrew duties can receive either immediate enlistment and posting to a training depot or enlistment and posting on leave without pay until a later date.

## CANADIAN UNIVERSAL CARRIERS UNEXCELLED

New Heat-treated Steel and Other Improvements Make Carrier Tough Weapon.

Past, low-slung universal carriers with a speed of 50 miles per hour over rough terrain and protected against small arms fire by armoured plating, form part of Canada's contribution to the modern way of waging war in mechanized vehicles. Improvements and adaptations made in the Dominion have transformed what formerly were scouting and light machine gun carriers into formidable armoured fighting vehicles.

Production of universal carriers in Canada now is sufficient to fill all Canadian requirements and the British Government is taking large quantities of these powerful tracked vehicles that can "turn on a dime," roar up steep hills or leap over small ditches with ease. One of the greatest improvements in the Canadian-made carrier is in developing metal for the tracks through heat treatment to last longer and withstand greater pounding than the British-made model. The wheels on which the

## 4 SPACE SAVING TIPS!

- Remove wilted leaves and all tops from vegetables.
- Don't crowd with unopened canned goods and other food items that will keep equally well on the pantry shelves.
- Put left-overs in the smallest containers that will hold them.
- Remove paper coverings from all except frozen foods.

Use but don't abuse VITAL MATERIALS ARE NEEDED FOR VICTORY

**CALGARY POWER CO. LTD.**  
SERVING ALBERTA

By following these four simple space-saving hints, foods will keep better, your refrigerator will have less work to do and it will serve you for years longer.

## Live Stock Market Shows Rise

During the first three months of this year, live stock marketings showed encouraging gains. Cattle numbered 70,148 head valued at \$3,583,100, an increase of 32 per cent. calves numbered 16,980 worth \$304,608, an increase of 44 per cent, and hogs numbered 585,853 worth \$12,912,500, an increase of 98 per cent. Sheep and lambs numbered 73,243, were valued at \$99,611, a gain of 38 per cent. Gains were also recorded in four milking, six per cent, concentrated milk, 57 per cent, clay products, four per cent, lime, 30 per cent and butter, five per cent.

Tracks rotate also received attention in Canadian experimental laboratories and now they too have longer life, adding greatly to the use of the carrier and cutting down the expense of production. Lieut-Gen. A. G. L. McNaughton, general officer commanding the 1st Canadian Army, commenting on the arrival in England of a fleet of Canadian universal carriers, said: "We are tremendously enthusiastic about the new carriers and the way they operate, and very pleased about the various extras added to this Canadian equipment."

IS FOR ELAND

The Eland is the largest of the South African antelopes. The males sometimes stand six feet in height and weigh over 1500 pounds.

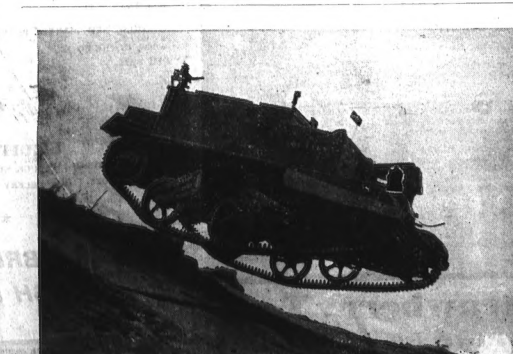

EATON'S

In these restless and trying times the practice of true economy is becoming more and more necessary to all of us. Budgeting and planned buying are now as important part of our everyday living.

That's why shopping from EATON'S Catalogue benefits you more than ever. No matter what you need—furniture, clothing, farm implements, hardware, shoes, dress goods, and you'll find them in EATON'S Catalogue—all assuring you the utmost in value and satisfaction.

## HONOR ROLL

The Recorder would appreciate reprints informing us of errors or omissions in this list, names compiled from names of men who have joined the ranks of the C.A.B.F. from their entire district.

To each soldier enlisted a complimentary copy of the Recorder is being mailed each week free of charge. Before this can be mailed, however, a questionnaire must be filled out, either by the soldier or by his relatives or friends. This form may be secured by applying at the Recorder Office.

The star preceding the name of the soldier in the following list indicates that a copy of the Recorder is being mailed to him each week. Readers are invited to co-operate in seeing that a star appears before each name in the list.

## Road Program Cut Due To War

Major road projects, particularly in the south and southeastern parts of the province, will be curtailed on account of machinery being loaned to the Dominion Government for defense work, according to officials of the Alberta public works department.

Already it has been necessary to revise the road program and discontinue available equipment that was left for provincial work. Two big graders have been taken over by the Dominion.

Surfacing operations in the south may be affected, just as these were hit in the first place when the federal oil controller refused to give a permit for oil to be used for paving purposes. Oil is a precious commodity that is required to help with the war.

In the north, the curtailment will not be so severely felt, as much of the work was grading and graveling, which still can be carried out, though the completion of some projects will be delayed on account of re-distribution of equipment.
